A digital turn-based strategy game where you fight on the western front during the last days of WW2. The Soviet Red Army is in full retreat. They have suffered heavy casualties and have lost a significant amount of tanks and artillery. Allied control of the Mediterranean has prevented reinforcements from arriving at the western front. Germany has been able to hold on to major cities in southern France while Canada and the US fight their way across France to punch their way to Germany. Set in 1944, as Allied forces attempt to stop the German advance, you'll take control of the German forces deployed on the French coast. Successfully complete the game to end WWII. Classic 8 player multi-player online turn-based real-time strategy with a single map and no timing limit. Play alone or with a friend in a co-op multiplayer match. Design your troops, oversee your battle plan, command your units, attack your enemies. Manage supply, build bunkers, research new technologies. Decide on attack or defense and control your troops. Prove your worth on the battlefield and defeat the other side. This is real time strategy like you've never experienced before. Create a strategy to dominate your opponent on the battlefield. Defeat your opponent to become a master of war. Online Co-op Multiplayer: Play offline with friends and online with the world. We've been a million miles away from Normandy for quite some time now, so it's with great joy that I can announce the latest DLC for Steel Division: Normandy 44, 'An American Tale'. Along with the new American themed content, there are also a number of other things available to players including 16 new tanks, 3 new weapons, and 9 new units. Enjoy! Mike A new American brigade combat team has been dropped into the mix, the US 32nd Infantry Division, made famous in the famous Band of Brothers series. The 32nd Division has fought through Western Europe and North Africa with their unique fighting style, and more than lived up to the reputation with their experiences at the Battle of the Bulge and during the fighting through Bastogne. The division has joined the Allies in the Allied invasion of France and was responsible for some of the first landings on the beaches of Normandy. On the American side of the battle, a total of 25,959 US Army soldiers would be wounded or killed in action during the campaign. However, the division

What's new:

Knights A list of some of the Knights Of Pyxel. Klon Klon is the leader of Pyxel. He has the ability to absorb all the energy of the Universe and store it in something he calls "Dust". The only way to attack a Klon is to banish all the dust in his mind. Unfortunately, this process requires him to sacrifice several of his knights. One of the names on his team is "Sentry" who is actually one of his fighters! Ox Ox has the ability to create anything he sees. In his case, he can even create matter and energy. He had created a lot of matter using an extremely large blast and some crumpled up newspaper. His time fighter is called "Barry" and is one of his most powerful knights. Vex Vex flies around with a telescope and a huge computer. His ability is to manipulate the universe teleologically. For instance, he is able to create little thought loops through time, but there is a limit to this. He can not make a thought loop between two particles of the same mass. Mickey Mickey is a big bruiser who can create matter and energy out of thin air. He is also capable of teleportation and can even create beings that were not there before. The name of one of his fighters is "Tinkerbell." His name is a reference to Tinker Bell, the character from the Disney movie "Peter Pan." Pyrrha Pyrrha is a powerful fighter. She is also a fly and uses her wings to fly. She is named after one of the main characters on "Dr. Who". Bert Bert is a simple fighter. His ability is to make anything move; straight or sideways. One of his fighters is this very same robot that he built from scrap! Gogo Gogo is a science fighter. He has a brain that keeps him up to date on the development of science and technology. He is capable of creating machines that are a part of science fiction. One of his regulars is the "Metatron", which is a pun on the Biblical name of Metatron. Max Max has the ability to appear anywhere in space or time. In terms of this, he is able to appear seemingly "out of nowhere" as well as from the future into the past. He believes that the universe is living and evolving,
