Get to know your vintage clothing By Paulina Perry There are no two ways about it, vintage clothing is in right now, and its popularity is set to continue well into the future. The reason is simple: the current fashion craze has exposed people to the joys of owning an item of clothing worn by someone else which gives them a sense of pride and connection to history. And, as this year's #vintagesummer trend — which was defined by the APF, as well as Vogue, Vanity Fair and other sources — has shown, the collection remains true to its roots. The vintage look is rooted in the 1940s-1950s and was originally for soldiers. Taking cues from the 50s, it was worn mainly by men. Eventually, women got in on the act, then it was taken to the 1960s, when the look became most prevalent. The most-committed vintage enthusiasts also stick to the fabric and construction of the time. Cotton or linen may be used, but not polyester, or nylon, etc. And if you want to be pretty sure you're getting the true vintage look, take the care when cleaning. While polishing up your outfits can be fun, it can actually have the opposite effect on items in your wardrobe, leaving them looking dull and lifeless. In the end, bringing back the vintage look is a matter of paying attention to detail. It's also a matter of being creative. It might not be possible to recreate an era's style with every item in your collection. So, invest in items that will provide the best homage to a period or style, and in these old gems, you'll find a wonderful piece to incorporate into your wardrobe.
