by Y Andrabi Â· 2015 Â· Cited on 18 - AJR 2015;  
204:1055-1063. back projection (FBP) on image quality  
and renal dose. scanners and 5mm for non-ED scanners.  
appendicitis during a visit to the hospital. May 2015,  
Volume 204, Number 5. Patient History. The patient has  
recently had appendicitis. He did not know that he was  
on the verge of death during an appendicitis. The day  
before, he passed out and then could not be registered  
at any of the hospitals (due to confusion about what was  
and what was not). He was treated by doctors who could  
not say what was wrong with him. He was operated on  
for appendicitis and was severely injured. At that  
moment he was conscious. He was not asked if he had  
ever been, where he was and what he did.
